Cognition vs. Metacognition - When Motivation Meets ...

Cognition vs. Metacognition. It is often difficult to distinguish the difference between cognition and metacognition. They are closely related and can often overlap. Flavell described an example such as "Asking yourself questions about the chapter might function either to improve your knowledge (a cognitive function) or to monitor it (a metacognitive function)." This quote shows how different

Getting started with Metacognition

As a result of research into metacognition, we understand that the effective use of basic cognitive processes is a fundamental part of learning. These cognitive processes include memory and attention, the activation of prior knowledge, and the use of cognitive strategies to solve a problem or complete a task. For a learner to ensure that they are making the best use of these basic cognitive METACOGNITION AND SELF-REGULATED LEARNING

Recommendation 3 Model your own thinking to help pupils develop their metacognitive and cognitive skills 16 Recommendation 4 Set an appropriate level of challenge to develop pupils self-regulation and metacognition 18 Recommendation 5 Promote and develop metacognitive talk in the classroom 20 Recommendation 6 Explicitly teach pupils how to organise, and effectively manage, their learning
