Did you know? Some of the highest mountains are at the bottom of the sea. Hawaii is at the top of a volcanic mountain in the Pacific Ocean. More than half the mountain is below water.

[The Mountain Environment and Effects on World Climate](#)

The Mountain Environment and Effects on World Climate Mountains have a profound influence on not only their local climate and immediate vicinity, but sometimes in areas a thousand or more miles away. This is due to the fact that mountains, jutting up into an otherwise orderly flow of winds around the globe, cause these winds to be lifted up, over and around the peaks and ridges.
